

ROOMFLOW

RoomFlow Privacy Policy

How RoomFlow handles property, guest, and reporting data.

Status: Pilot Version - 2026

1. Overview

This Privacy Policy describes how RoomFlow collects and uses information in connection with its digital guest tipping and property operations platform.

2. Information We May Collect

- Property details such as property name, room information, and management contact details.
- Guest transaction-related data needed to process tips and generate reports.
- Operational data such as QR token activity, room identifiers, and portal usage records.
- Support communications between RoomFlow and the Property.

3. Payment Information

RoomFlow does not store guest card numbers. Payment information is processed by Stripe or another payment processor used by RoomFlow.

4. How Information Is Used

- Operate the guest tipping experience.
- Generate property reports and export files.
- Support QR asset generation and room management.
- Provide support, troubleshooting, and pilot review.
- Maintain platform security and performance.

5. Sharing of Information

RoomFlow may share information with payment processors, infrastructure providers, and service providers as needed to operate the platform. RoomFlow does not sell guest payment information.

6. Data Security

RoomFlow uses reasonable technical and administrative safeguards to protect information. No system can guarantee absolute security.

7. Data Retention

RoomFlow retains operational and reporting information as needed for platform functionality, support, reporting, compliance, and business records.

8. Contact

Privacy questions may be sent to info@roomflowhq.com.

Note: This template is provided for operational readiness and should be reviewed by qualified legal, tax, and payments counsel before broad commercial use.
