

ROOMFLOW

RoomFlow Service Agreement

General service terms for participating properties.

Status: Pilot Version - 2026

1. Parties and Purpose

This RoomFlow Service Agreement outlines the general operating relationship between RoomFlow and a participating hotel, short-term rental operator, or property management customer (the "Property"). RoomFlow provides a digital guest appreciation and tipping platform that allows guests to scan QR codes, select a tip amount, and complete a secure online payment.

2. Services Provided by RoomFlow

- Property setup and onboarding support.
- Generation of room-specific QR codes and guest tipping links.
- Printable QR assets such as room cards, posters, and QR files.
- Management portal access for property reporting and operations.
- Exportable tip activity reports for use in the Property's existing tip distribution process.
- Reasonable support during launch and ongoing operation.

3. Property Responsibilities

- Provide accurate property, room, and contact information.
- Place approved QR materials only in authorized guest-facing locations.
- Maintain its own tip distribution, payroll, tax, and employee payment practices.
- Review tip reports and distribute funds according to its internal policies.
- Notify RoomFlow of operational issues, incorrect room details, or misuse of QR materials.

4. Payments and Payouts

RoomFlow uses Stripe and Stripe Connect to support secure online payments and connected account payout setup. Guests may be charged a processing fee so the intended tip amount can be preserved for the housekeeping or cleaning team. RoomFlow does not store guest card information and does not act as the Property's payroll provider.

5. Fees and Subscription

RoomFlow may charge a monthly subscription, pilot fee, setup fee, transaction fee, or other commercial fee as agreed in writing with the Property. Pricing may vary by pilot, room count, property type, service level, and implementation requirements.

6. Reporting and Tip Distribution

The RoomFlow portal provides reports and exports designed to support the Property's existing operating process. The Property remains responsible for determining how tips are assigned, distributed, taxed, reported, or otherwise handled under its policies and applicable law.

7. Data and Privacy

RoomFlow will use reasonable safeguards to protect operational data. RoomFlow may process guest payment activity, room identifiers, property information, and reporting data as needed to operate the platform. Payment information is processed by Stripe.

8. Term and Termination

Either party may discontinue a pilot or service arrangement according to the terms agreed in writing. Upon termination, the Property should remove RoomFlow QR materials from guest-facing locations unless otherwise approved.

9. Limitation of Role

RoomFlow is a technology and reporting platform. RoomFlow is not a bank, payroll provider, employer, tax advisor, legal advisor, or staffing agency.

10. Contact

For support or operational questions, contact RoomFlow at info@roomflowhq.com.

Note: This template is provided for operational readiness and should be reviewed by qualified legal, tax, and payments counsel before broad commercial use.
